DETAILED ACTION

Reissue Applications

1. Claims 15-18 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc. v. Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement*, 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp. v. United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application. Detailed rejection is discussed in paper No. 10, mailed on 10/02/01.

2. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

Response to Arguments

2. Applicant's arguments filed 1/22/02 have been fully considered but they are not persuasive.

The above rejection repeats the rejection on paper No. 10, and is maintained. On paper No. 4 (amendment a) the discussed limitation, including the **flexible support meas** was added as the improvement to the prior art membrane device (see amended claims 1 and 9). In the same paper, page 7, second paragraph applicant stated "Applicant discovered that if the fibers I an extended skein wee no bundled, but potted in spaced apart relationship, spaced apart by a flexible support means, there was not damage to the fibers over an extended period.". Therefore, that limitation constitute the improvement over the prior art, and is critical to determining allowability of the claims over the prior art of record. By narrowing the claims with this limitation, applicant gave up the broadest aspect of the claim, which can not be now recapture bu reissue, ever if the claims are narrowed in another aspect. The said limitation above and the narrow limitation both need to be in the claims of the present reissued Application. In the Declaration of Manhendra et al (1/12/1998), section 14, it is point out as critical the fibers to be cushioned with resin, forming the flexible support, which is supported by reference 08/690,045, in specification, page 23, paragraph . The Declaration was filed to distinguish over the prior art rejection, in particular over Kunio. See, In re Pannu, 47 USPQ 2d 1657. (Peannu v Storz Instrument Inc.).

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1723

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
